Examiner's Comment/Reasons for Allowance

Information Disclosure Statement

This supplemental action contains the information disclosure statement (IDS) submitted on 24 August 2005 not previously considered by the Examiner. No action is required by Applicant in response to this correction.

Reasons for Allowance

Claims 1, 4-5 and 7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the art of record does not disclose or fairly suggest a disposable diaper having a) a waist elastic fixed between a topsheet and backsheet in a stretched state; b) extensible side part fixed between two sheets of a main body in a stretched state; c) a fastening tape basal part fixed between two sheets of a main body; d) saturated absorption capacity ratio; e) absorbent member flexural stiffness; f) a tensile load in the range claimed along with the other claimed elements.

The following is the closest prior art:

Aleman et al. (US 5,234,423) discloses a disposable diaper with a) waist elastic 35 disposed between topsheet 24 and backsheet 26 (column 22, lines 22-35) but *in an uncontracted state* (column 23, lines 15-18 and 29-31); b) extensible ears/side parts fixed between topsheet and backsheet of a main body (column 4, lines 7-6 of Buell US 4,081,301 incorporated by reference at column 40, line 20; c) fastening tapes 92 *joined* to backsheet 26 (column 28, lines 45-51 and column 29, lines 25-28) rather than sandwiched between two sheets of a main body; e, f) varying flexural stiffness and

tensile loads but no motivation to modify them in the claimed ranges for improved article performance. There is no motivation to modify the fastening tapes to have a basal part fixed between two sheets in a stretched condition since Alemany teaches the topsheet, backsheet, elastic side panel, and any other components are secured together in an uncontracted/unstretched condition (column 40, lines 42-45).

Garfinkiel (US 3,616,798) discloses a disposable diaper with elastic leg straps disposed between two sheets of a main body on lateral ends (column 2, lines 16-19 and figure 1) but there is no motivation to modify the leg straps of Garfinkiel to be fastening tapes in a stretched condition as claimed.

Miller et al. (US 4,904,249) discloses a disposable absorbent article with basal part of straps 130 fixed between two sheets of a main body and having *button* fasteners 132 through slits 120 (figure 1) but no motivation to modify these straps to be fastening *tapes* along with all of the other claimed elements for ease of wear in a standing or sitting position.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura C. Hill whose telephone number is 571-272-7137. The examiner can normally be reached on Monday through Friday (hours vary).
